MOLINA DE SEGURA

Molina de Segura is the main city of La Vega Media with a municipal area of 169 Km2. It is situated just 10 km away from the capital, Murcia.

It has excellent communications by highway. San Javier airport just 58 km and Alicante Airport 87 km away from Molina.

During the 20th century, Molina de Segura was one of the main industrial cities of the Region, specially canned food factories. We can see some chimneys that remind us that period in different squares.

Nowadays, its economy is based on the agriculture and the industry, especially leather and candy factories.

We found evidences that Iberians and Romans settled in the old part of Molina (Castle Quarter) but it was considered as a city in the Arabic period. Around the Castle quarter, we find different places worthy a visit: remains of a medieval wall and a Viewpoint with spectacular views over " La huerta", on the top of the castle Quarter called La Maita ; The Old Square, where the first Council was placed ; The Assumption Church, the oldest church of the city.

Molina de Segura has 4 museums. The most modern is the MUDEM. This museum contains 125 metres of the medieval wall dated from the XI to XIII Century, 5 square towers, a 9 side tower and a triple elbow door. It is possible to see another piece of this medieval wall in Pensionista Street, in the Tourist Office.
